

ACD-Team contribution to the LeMOON Modules 1-6.

LeMOON Module 1. Human and Nature

There is no country which has not observed the impacts of climate change in different sectors. The EU suggests that effective environmental education is essential in fighting climate change and solving environmental problems. Unless effective environmental education is provided to all segments of society, environmental issues will continue to be the most crucial problems of the 21st century.

Module 1 resources aim to help students observe nature, discover its delicate balance, and develop a positive attitude towards preserving natural balance by recognising the interaction between humans and nature and the roles of living and inanimate beings in this interaction. Module 1 keywords: nature, living and inanimate beings, natural equilibrium/ balance

WORKSHOP Sessions: Understanding Sustainable development: Human Rights, Cultural diplomacy2030 ...; Space Education; The environmental ethics and dilemmas, Sustainable development approach to Love; art mediations

This Workshop sessions were designed by **Tatjana Christelbauer MA.**

Contributors: Mag. **Tamara Tomasevic** and Dr. **Geraldine Fitoussi-Hoffmann**, ACD, Austrian team

Thematic Units for Week-Long Workshop Sessions: Inquiry-Based Integrated Learning Workshop Series on the Intersection of Arts, Science, and Policy

LeMOON Module 2: Cyclical nature: Human energy, respiratory flow, dreams, dance & mathematics

Module 2 aims to help students classify natural resources, notice the flow of matter and energy in nature through the cycles of matter and energy, and comprehend the effect of this flow on natural life and living things.

This Workshop was designed by Tatjana Christelbauer MA.

Contributors: Dr. Nathalie Tassotti (dance & math lesson part); dipl. Ped. Carla Laszakovits (BBI Vienna, circadian rhythm of BVI)

LeMoon Module 3: Nature and climate change: Weather & Climate in science & arts

Module 3 aims to introduce students to climate change and includes the greenhouse effect and global warming as causes of climate change. While studying the greenhouse effect and global warming, it is also suggested that meaningful combinations with consumption and other reasons be made, and pollution and some other environmental problems should be studied as well.

WORKSHOPS: Weather and climate, Arts4Science

This Workshop was designed by **Tatjana Christelbauer MA**.

Contributors: Mag. **Andrea Nagl (dance arts, environmental ethics) Tomasevic** and Dr. **Geraldine Fitoussi-Hoffmann (crossword)**, ACD- Austrian team
